WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Cut 457 x 297 mm from 3 mm ceramic fibre sheet with a sharp knife and a steel rule; trim so it lies flat on the tray floor.

Six 12 mm holes at the standoff positions (the same places as the tray's stud holes): 124 mm each side front to back, at 210 left, 45 left and 120 right of centre. Cut with a 12 mm hole punch or knife.

Wear a dust mask (FFP2 or N95), gloves and long sleeves; cut outdoors or with dust extraction; wet-wipe the bench afterwards.

Fit: lies loose on the floor round the standoffs, 2 mm clear of each.

Check: no tears; the floor is covered except at the six holes.
