WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

A C-shaped ring 10 mm long, 1.6 mm wall, that springs over the top of the cell and wraps 10 degrees past its sides on each side.

21700 clip: 21.0 mm inside. 18650 clip: 18.3 mm inside.

Raised pad on top, 7 x 10 mm and 3 mm high, with a 2 mm hole down through it for the thermistor bead, which touches the cell;

a dab of thermal paste between bead and cell.

Print with the ring's axis vertical; no supports.

Fit: push down over the cell between the holder's contact posts;

the lower edges stay at least 2 mm above the holder.

Check: it grips the cell and does not slide when the lead is tugged.

CELLCHECK

github.com/BoujeeEnjinia1701/cellcheck

CellCheck thermistor clip (print 8 for 21700, 8 for 18650): making sketch
